Education **Central Michigan University - Mount Pleasant, MI**
Bachelor's of Science in Psychology with a Computer Science minor | **3.86 GPA**
Graduated Magna Cum Laude with a 3.86 grade point average.
My work in psychology has provided me with insight into what an individual might want from an application or web page I code. My experience in psychology lends itself readily to this aspect of application development.
The courses I took in computer science were heavily focused on fundamental programming techniques.
